## SHOWCASING Playground Designs for Schools!

### PARK SUPPLIES & PLAYGROUNDS

A playground design, manufacturing, installation and maintenance specialist. We strive to make playgrounds that ignite adventure, inspire imagination, and create joy and excitement in children through play.

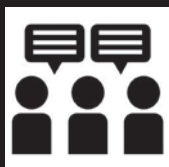

- Design and manufacture our equipment in New Zealand.
- Design and build playgrounds that give your children a play experience that inspires learning, imagination, adventure and joy.
- Make fully customisable playgrounds designed specifically for your community.
- Design and build playgrounds that aid children in their physical development, fitness and growth.
- Project Manage your playground development from start to finish.
- Offer full parts, repair, maintenance and after install care service.
- Making playgrounds in New Zealand for over 30 years.

# PREFERENCES

## Customise your playground

3

### CUSTOM ROUTERING & POLYPLAY PANELS

PolyPlay is a unique material exclusive to Park Supplies & Playgrounds that allows us to fully personalise your playground. Our in-house design team can take your logo, motif, important words or sketches and convert these to CNC engraving onto the panels of your playground. We can customise rockwalls, panels, carousels, fitness trails or any panel item.

### COLOUR OPTIONS

PolyPlay is available in three colour choices Lime Green, Sky Blue and Nature Green.

LIME GREEN

SKY BLUE

NATURE GREEN

### Durability

- Unique 12mm thick co-extruded polyethelene, will not delaminate.
- UV stabilised, protection against fading.
- Graffiti resistant, impregnable material for ink.
- Tough, durable and long life.
- Made in New Zealand for NZ conditions.

### Recyclable

- Polyplay material can be 'end of life' recycled.
- All waste and off cuts are recycled to make new boards.

### CUSTOM ROUTERING

Park Supplies & Playgrounds offers a unique custom routing service, which means your playground can be fully customised for your school at very little additional cost.

### SURFACE OPTIONS

There are many surfacing options available for your project. Some are listed below.

MOST POPULAR

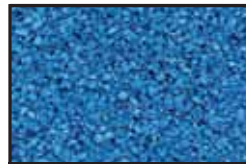

WOODCHIP

Loosefill is a great surface for falls up to 3 metres. We construct timber edgings and install a certified woodchip that has a longer life span than bark. We can construct a timber edging and supply and install the certified woodchip.

RUBBER MATTING TILES

Rubber Matting Tiles provide a great aesthetic finish to your new playground. We have many options available. Tiles can add a layer of security, with individual tiles being replaceable should vandalism occur.

WET POUR GRANULE RUBBER

Wet Pour Rubber provides a unique finish to your new playground. Combining multiple colours, curves and shapes to create a visually dynamic surface.

SYNTHETIC TURF

Synthetic Turf provides a great grass look to your new playground. There are various grass pile height options to choose from.

# SELECTING A PLAYGROUND DESIGN

## PLAYGROUNDS ARE IMPORTANT!

When children explore playgrounds, they are building important life skills that will eventually help them become effective thinkers, leaders and collaborators.

Creating an environment where children can experience unstructured play supports their physical health and increases their chances of success in the classroom. Playtime can also have a calming effect, helping with disciplinary issues and impulse control.

AND of course it should be a place where they can have FUN!

## WHAT TO LOOK FOR IN A WELL-BALANCED PLAYGROUND...

A well designed playground should offer physical, emotional, social and solitary play benefits for the children. A well-balanced playground should have a mix of elements to mentally and physically interest and develop the target age group of children.

### THE PHYSICAL

Physically a playground should help develop important fine and gross motor skills. The features of a playground should build strength, flexibility, co-ordination and posture, as well as aiding the growth of healthy bones, joints and muscles.

A playground should contain activities that assist students to;

- Support their own body weight, including inverted positions
- Build grip strength through a wide variety of grips
- Strengthen their upper body and core
- Improve their agility, flexibility and fluidity of movement
- Improve focus, accuracy, problem-solving and mental acuity

### THE SOCIAL

Free play is an essential tool for allowing children to develop a sense of who they are and to value the thoughts and feelings of others. All of the activities we design will help children to make subtle changes in their emotional wellbeing by developing self-confidence when experimenting with skill and challenge.

Our playgrounds make it is easier for children to create social connections through free play, teaching them how to interact and share with each other. However we also offer opportunities for solitary play. Providing solitary play will give children time to think, explore and create.

## A RANGE OF PLAYGROUND FEATURES THAT CAN ACHIEVE THIS ARE;

**PLAYGROUND DESIGN CAN INCLUDE COLOURS AND FEATURES THAT IGNITE ADVENTURE, INSPIRE IMAGINATION AND CREATE JOY AND EXCITEMENT IN CHILDREN THROUGH PLAY.**

A playground does not need to contain everything. Different playgrounds have different purposes depending some factors, such as the target age group and the type and style of other playgrounds nearby.

## POST OPTIONS AND SHADE

We have two post options available for your new playground, both with unique features.

### TIMBER POST

Park Supplies & Playgrounds uses H5 Pine Timber (90 x 90mm). This is our post of choice as it adds a great natural contrast to the overall play equipment, is tough and durable and also economical as a post material. Our posts are finished with rounded edges and are sanded smooth.

### FEATURES

- Economical
- Contrasting Aesthetic
- Natural
- Durable

### STEEL POST

We use a 90mm diameter round galvanised post with a very tough and durable coating system, which includes a baked layer of zinc shield ensuring thickness and adhesion. A final polyester colour layer is added with a colour of your choice. Steel posts are a premium option and cost more than timber posts.

### FEATURES

- Highly Durable
- Colour Options
- Graffiti Resistant

Shade is an important playground design consideration. Park Supplies & Playgrounds can incorporate shade sails in your proposal and project manage the installation. Please let us know if you would like to include this in your design and quote.

# FREE STANDING EQUIPMENT

## Spinners

Our range of freestanding elements can be used on their own to create a small feature play area. They also make great additions to modernise any tired or existing play area. With small footprints and loads of fitness and agility features, these items pack a lot of play value.

## KIDS LOVE MOTION!!!!

- DYNAMIC ELEMENTS IN PLAYGROUNDS TEACH CHILDREN ABOUT INERTIA, CENTRIFUGAL FORCE AND REACTION PHYSICS!

### Lunar

FS414

Age Level: 5-15 yrs  
Area Required: 5.6 x 5.6m

## Balance and Rope Climbers

Incorporating balance and rope climbers into your playgrounds helps children develop the skills and muscles to :

- Support their own body weight including inverted positions
- Build grip strength through a wide variety of grips
- Strengthen their upper body
- Improve their core strength
- Improve their connectivity, flexibility and fluidity of movement
- Become more agile
- Improve focus, accuracy, problem solving and mental acuity

Timber pole and rope activity cube

Balance Toadstools

Add another level of difficulty with springy balance beams and Toadstools!

Combine balance beams, stepping logs, Toadstools and rope activities to **create a sensory play area** at your school

Physical Size: 3.5h x 21.7 x 9m

Post: Steel only

# PLAYSCAPE DESIGN:

We can work with your school to create an area that incorporates play elements with planting, interesting surfacing, tactile experiences, balance, seating and themed areas to create a playspace

We aim to create:

- Open spaces for free play and socialisation with added choices for solitary play.
- Natural, appealing elements and soft scaping to encourage unwinding and relaxation.
- Subtle skill elements (balance equipment) that will help to progress and develop coordination, focus, accuracy and core control.
- Areas for imagination
- Areas of seating & relaxation
- Elements for learning spatial awareness
- A homely backyard feel to explore emotion and use their imagination
- Sensory feel

## Playscapes aim to:

- Help young children to find their feet socially and emotionally as they enter into school life
- Add skill and challenge to assist their developmental needs and something for each individual imagination
- Offer activities that develop a child's core strength. Incorporating balance is essential to progress not only their core strength but also co-ordination and accuracy. Skills which can easily be transferred into the classroom
- Give options to sit and socialise or challenge their skills
- Include a variety of colours and shapes gives the extra dimension of play
- Build a great use of imaginative play while including benefits of grip strength, hand/foot co-ordination, spatial awareness, developing the vestibular system, crawling and scooting to enhance physical activity

## CASE STUDY: Baradene College - Senior Playground

Baradene College opened their brand new playground and for us at Park Supplies & Playgrounds, this project was something of a first.

We are renowned for the bright colours of our playgrounds which children love. Check out the new 'Nature Green' combination on the Baradene playground. The combination of the light green steel, wooden posts, nature green PolyPlay and rubber matting creates a stunning playground that blends in with the school's surroundings.

The playground is located on an unused slope, which we needed to turn into a flat surface for the playground. We were able to achieve this through the use of retaining walls. They are a reliable and trusted way of changing the landscape to suit your playground. So don't let that sloping site put you off, it can be turned into the perfect playground space.

## CASE STUDY: Matipo School

33

Matipo Shute Playground

### MATIPO PRIMARY ADDS ADVENTURE AND PHYSICAL DEVELOPMENT TO SCHOOL PLAYGROUNDS.

Hollie Colegate has always had a passion for the community out west in Te Atatu Peninsula. It is a special place for those who live there and the community around one of their Primary Schools, Matipo Primary, has always been a highlight for Hollie.

It is this passion for fitness that led Hollie to lead the charge for the schools brand new playground.

The idea of a senior school playground focused on balance, strength, mobility, and adventure appealed to Hollie and she became the self-appointed 'application director' to the Million Dollar Mission.

With only one week until applications closed, Hollie had to move quickly to get the 3 quotations required.

Hollie said "I called around as many companies as I could to get a quote. Jenny from Park Supplies & Playgrounds was the first to come out to school and get a feel for what we wanted"

With the site visit complete and a tight turnaround required, Jenny provided Hollie with a proposal for a playground that utilised several of Park Supplies & Playgrounds pre-set designs and equipment. These included an Orex Spinner, the Shute Playground along with a series of balance and strength activities.

Fundraising for the additional money came from the community and soon Hollie was able to present the new plans for the playground to the students. They looked at the brochures and helped to finalise the plan for the playground.

With the playground now installed and kids eagerly awaiting the opportunity to play on the new playgrounds, Hollie is thrilled with the result.

And of working with Park Supplies & Playgrounds Hollie has this to say,

"Jenny has been fantastic. Her enthusiasm for our playground was evident at the start and her communication throughout the process has been terrific. The guys who installed the playground were wonderful and everyone enjoyed having them onsite.

Working with Park Supplies & Playgrounds was wonderful. They were super professional, great communicators and they created solutions for us, not just answering questions. They looked for solutions with a lot of aroha."

Orex Spinner

## Completed Projects

Ranui, Mangere East, St Heliers, Remuera and Green Bay School's.
